Typed: 16<sup>th</sup> December 2015

Dear Past Setters,

**Re: David Kee, dob 25.12.1984**

Following our recent conversations it has become clear to me that David needs your help.

David has been attending my clinic for some years and since 2006 has been obsessed with constructing an Armchair Treasure Hunt and getting more teams participating. This obsession intensified when he was given the slot for the 2015 hunt. David wanted his hunt to be the biggest ever and he subcontracted most of the work to that shadowy organisation ATH Corp, the UK off-shoot of the Puzzle Palace Group.

At our most recent session David produced the completed hunt. He was keen to tell me that he had buried the treasure after our previous session and it was ready to go. Unfortunately David then proceeded to to destroy the completed hunt; cutting up pages, tearing pages and burning pages. All the time muttering "Yes - there really is buried treasure out there!" again and again. David has now entered a non-responsive state, although he is playing the saxophone.

It is my opinion that to get David out of this state we need to show him where he buried the treasure box. Unfortunately it appears that David had the only paper copy of the hunt, everything else is held by ATH Corp and they will only deal with David. However, I have managed to rescue some of the damaged pages (I may recover more) and I did manage to bug David's journey when he buried the treasure box.

I am asking you and the teams that compete in the annual hunt to locate the treasure box. I appreciate the hunt is incomplete but I have the impression that you are a resourceful group. I will be available over the next few weeks if I can be of any assistance, please email me at [GHF@actonhospital.co.uk](mailto:GHF@actonhospital.co.uk) or call me on 0788 060 1409 for more urgent matters, e.g. if you have found the treasure box or it has been disturbed. It would be good for David to see progress towards locating the treasure box, so if any teams are able to give me access to their workings during the search I will facilitate David's involvement.

To complete David's recovery he will need to work through the hunt repeatedly and so it would be helpful if teams could submit to me their understanding of the hunt, and their treasure ticket number if they find the box, by **noon 12<sup>th</sup> January 2016**. Mark your submission as *virgin* if this is your first hunt, David will be encouraged by new teams' participation. David was also hoping for global involvement, so if you work out where the treasure is but are unable to visit the site then please let me know as soon as possible. Assuming you are successful I am sure that David will mark the submitted solutions and arrange a prize giving for those that have helped him recover.

Yours sincerely

**Dr G.H. Frunt**  
**Consultant Psychiatrist**
